

Wipes great with three-layered mesh sheet!

Simply warm in the microwave and wipe!

The mist floats the grime, then baking soda and orange oil work together to wipe off sticky remains in the microwave. There's no need for a dry wipe, and it disinfects at the same time. You can use it around the kitchen where you have food.

*Not all bacteria is eliminated.

- Feature No. 1** Vapor lifts the remains, baking soda + orange oil cleans!
Vapor lifts the remains, and baking soda and orange work together to wipe off sticky remains inside the microwave.
- Feature No. 2** Mesh sheet enables extra peeling effect
Mesh sheet being used is also used in the commercial cleaning industry, so its peeling power is renowned.
- Feature No. 3** No need for double wiping
It uses a special safe solution that can be used on microwaves and in the kitchen, around food items with ease. There is no need to wipe twice.
- Feature No. 4** Sterilizing effect
*Not all bacteria is eliminated.
